

WINDOW AND DOOR RENOVATION

All the windows and doors inside of the balconies will be replaced. The renovation work will start on week no 38, beginning from stairwell A. The first day of renovation is Tuesday 17th September.

The residents will be informed of their own renovation day 1-2 days before the work. However, if there is a need to choose another day, it is possible to ask this. The working hours will be from 8 am to 4 pm.

New doors and windows will be moved from outside to the balcony. The inhabitants must clear the working area for renovations. All the balcony area will be reserved for working area, and there must be at least 1,5 m free space inside the apartment. Some work will be done from the balcony and some of it from the inside.

All furniture, flowers, curtains, electronics and carpets in the working area must be moved. Also, thermometers, lighting devices and cables must be detached and if possible, all fragile lamps must be removed from the ceiling.

The old windows and doors will be recycled and if there are any objects attached, these will be wasted. Renovation will have a trembling effect, and therefore all paintings on the wall near-by the working should be removed.

Some work will be done after installation. For example, all the windows will be cleaned by a cleaning company.

Protecting furniture and electronics

A large amount of dust will be caused by the renovation. The contractor will give protective plastic material, and the inhabitants should cover TV's, computers, pictures and furniture in the living room.

The workers will cover the floors in the working area using thick carpets. Afterwards, they'll also clean up the working area, but it is highly recommended to vacuum the whole room.

After the renovation, feedback will be asked from the residents. All faulty parts will be replaced.

Safety first

We strongly recommend not going inside the working area during the process. Also, all pet animals should stay away from the working area.

You can ask about the renovation and about the dates from the contractor:

Sani Lintula tel. 0414603436

The members of the board are also willing to give more information.

Kind Regards

Mika Snellman, Kaskipuu Oy and Asunto Oy Yläoksa Hallitus
