

KLON & KLNN

High performance 2 layer sleeve systems

The KLON and KLNN sleeves are one piece wraparound sleeve designed for corrosion protection of both offshore and onshore steel pipelines. These sleeves are designed using a High Density polyolefin backing for improved mechanical protection and either a thermoplastic hybrid or a high shear mastic adhesive for easy installation and high corrosion protection.

Rapid & Reliable Installation

- Engineered for the specific needs of quick applications, the KLON and KLNN sleeves are designed to be suitable for installation onto a minimum St 3 surface preparation level.
- Allow for decreased cycle time and increased product rates with excellent product application consistency

Unique Adhesive Technology

- Allows for lower installation pre-heat temperatures and superior bonding to many mainline coatings used on both onshore and offshore pipelines
- Engineered to be water quenched to increase productivity rates

Long Term Corrosion Protection

- Provides a protective coating with the structural integrity of a seamless tube, providing excellent resistance to Cathodic Disbondment and excellent durability against abrasion and chemical attack.

Saves time and Money

- Supplied as a one piece system for easy and faster application to increase field joint production rates
- Lower Pre-heat means less time heating and a faster installation
