

CORESTO

Equipments for corrosion- and process measuring and corrosion prevention

...and the whole system could be remote monitored from anywhere...

Graphics visualized interface for system monitoring and controlling...

Coresto Oy is a limited-liability company from Finland. Our core of business is preventive maintenance of process equipment, structures, buildings and vessels. Well planned and realized preventive maintenance can save you millions a year.

VICO

Our aim is to save you the money with our expertise and products. Our products include equipment for monitoring, measuring, controlling and protection. Services include electrochemical corrosion measurements for optimizing various processes and for example automatization of chemical feeds to save expensive chemicals.

MECO

Intelligent distributed units for corrosion- and process measuring

Intelligent distributed units for process corrosion minimizing and for process optimizing

MICO

PROBES

Our standard probes or tailor-made probes to fit custom's requirements

Founders of the company have years of experience in the field of electrochemical process monitoring and corrosion prevention. We offer this experience and our products at your service.
