JAKE 600

The **JAKE 600** has been designed to mount a flange fastened crane with gross lift moment under 60 kNm and outreach up to 7,5 metres on a tractor*. The **JAKE 600** also suits to a light harvester head and a mulcher use. For bigger cranes or heavier implements the choice is a **JAKE 800** or **JAKE 900**.

Compared to a trailer-mounted crane the **JAKE 600** increases the payload of the trailer as the weight of the crane is not on the load but on the tractor, increasing pulling power of the tractor as well. The tractor equipped with a **JAKE Boom Support** gains the pulling power even more by sharing the crane weight partly onto the front wheels.

The **JAKE 600** makes using the crane versatile as the crane mounted on the tractor can be combined with other devices and equipment connected to a 3-point linkage and a trailer hitch usually with no limits.

* Choose JAKE 804 or 904 for Valtra N4 and T4.
