JAKE 804 LC

The **JAKE 804 LC** has been designed to mount a truck-mounted loading crane up to 30 tm on Valtra N4 and T4¹. The loading crane mounted on the tractor is the efficient solution for power line maintenance and many other all-terrain tasks.

JAKE Front Outriggers, PTO Pump Unit, Oil Tank, Toolbox System and Boom Support complete the unit. We can supply the whole unit, including the tractor and crane, or use an existing tractor and/or crane.

¹ Only for Valtra N4 and T4. For other tractors see JAKE 800 LC.
