

Patented Wireless Solution for Growing Camera Phone Markets

LH Communications

Presentation

18.07.2014

Your options

- **Ape TV** is patented wireless solution for watching Camera Phone photos and videos on TV via Bluetooth&wifi.
- You can watch everything on TV what you have on your mobile phone it means that with this streaming media device your tv can ape your mobile phone.
- Our company has launched our new product Ape TV with Bluetooth 4.0 chip
- Camera Phones now in the world: 4,2 billion (Communities dominate brands)
- Ape TV is based on our own patent “Method of transferring data of screen and voice from a mobile phone to a television”
- We have patents in USA,Europe and Finland.

Ape TV

We have three strong arguments against our competitors:

- 1) Ape TV will use Bluetooth 4.0 chip which is according to our patent US6947067 and which is the best and provides the highest level of integration for a mobile and handheld wireless systems.**
- 2) Our product will be available with almost all operating system. The key systems will be Windows and Android.**
- 3) You can connect Ape TV by using HDMI or SCART**

Bluetooth&wifi

U.S. STATISTICS

•This year about 54% of homes in the U.S. had more than 3 or more television sets, 28% had 2 television sets and only 18% had 1 television set. There were 114.5 million TV homes in the U.S. in 2009. (Nielsen's Television Audience Report)

That means that in the U.S. there are more than 200 millions of television sets.

•I can imagine that some company can sell more than 50 million accessory for tv's to watch mobile pictures.

Bluetooth 4.0

- ▣ Our company has launched our new product Ape TV with Bluetooth 4.0
- ▣ The Bluetooth SIG completed the Bluetooth Core Specification version 4.0, which includes *Classic Bluetooth*, *Bluetooth high speed* and *Bluetooth low energy* protocols. Bluetooth high speed is based on Wi-Fi, and Classic Bluetooth consists of legacy Bluetooth protocols. This version has been adopted as of June 30, 2010.

Bluetooth + WLAN (4.0 includes 3.0)

Basic information about Bluetooth 3.0

The core of Bluetooth 3.0 operates with 802.11 PAL (Protocol Adaptation Layer), in other words 802.11 WLAN –connection.

When transferring a lot of data the system will use automatically WLAN connection, so called wifi.

LH Communications patents:

In USA

- US 6,947,067

In Europe

- EP 1356678 (adjustment)

In Finland

- FI 110046
- FI 20080277, PCT/FI2009/050260, (WO2009125
