

Five steps to get fast and reliability Internet acces from Pielisverkko

1. Fill and return your signed order
2. Pielisverkko makes the review and the construction plan of optical fibre cable to Your property and sends to You the offer and the invoice
3. You accept the plan by paying the invoice
4. Pielisverkko constructs physical network up to interface 1.(see the picture below) and informs to You, that the network is ready for use
5. You purchase Your apartments equipments and installations. When those are ready for use, let us know the date of Internet services opening (usually the installation partner informs us at least two days before the installation, so he can make everything compete for use.
6. Go to Internet and enjoy!

Equipments:

1. Terminal box of the optical fibre cable, the interface and the responsibility of Pielisverkko.
2. Modem, converts optical signal to electrical mode. Includes firewall, four RJ45 ports and WLAN. Packet includes the connection fibre cable.
3. TV-box, adapter for digital TV.

Prices of physical solutions, incl. VAT:

1. From Internet acces point to the terminal box 1.500€.
2. Approximately 170 – 200€ depending among other on physical distance to Internet acces and monetary rates.
3. Approximately 150€ depending on monetary rates.

Installations: Depending on the extent and difficulty of installation and the installers travel costs typical price is 200€ incl. VAT .
