## Lead Free Bullets

Trumpeting TARVAS Lead Free Hunting Bullet has been designed to hunters who appreciate excellent stopping power with minimal meat loss

Distance (m)	0	50	100	200	300
Velocity (m/s)	805	756	708	617	534
Energy (J)	3467	3058	2682	2037	1526
Trajectory (cm)	-4,5	1,5	3,2	-8,8	47

- Reliable bullet opening up to 300 m

- TARVAS gives minimal meat loss regardless point of impact  
 - Short escape distance guaranteed by hydrodynamic shock wave in the vitals

- TARVAS gives minimal meat loss regardless point of impact

- Deep penetration enables high hydrodynamic shock wave in the vitals with extreme killing power.

- Short escape distance. Statistically 70 % is found within 10 m and 98% within 100 m from the first deadly shot Refer to hunting reports in [www.facebook.com/redmoose.eu](http://www.facebook.com/redmoose.eu)

- Same high stopping power and minimal meat loss with wide selection of calibre's enables the use of same rifle and cartridge for large variety of game

- TARVAS Hybrid Ogive which gives it great external ballistics and accuracy

- TARVAS is monometallic, lead free and nontoxic hunting bullet with high weight retention (98%)
