

# **JAKE** Forest Tank + Armour for Valtra N1-series

**JAKE** Forest Tank + Armour has been designed to be mounted instead of an original plastic fuel tank of Valtra N1-series. The **JAKE** Forest Tank consists of two steel tanks and includes an integrated armour part. These together protect the basis of the cabin. As well the **JAKE** Forest Tank includes a battery case and a tool box, both armoured and lockable. The **JAKE** Forest Tank does not demand, unlike other **JAKE** Armour Plates, the presence of an aid frame of the **JAKE** Mounting Kit but surely the **JAKE** Mounting Kits are compatible with the **JAKE** Forest Tank. The capacity of the **JAKE** Forest Tank is 210 litres and an original fuel meter of Valtra shows a precise volume of the fuel also in the **JAKE** Forest Tank.

Without **JAKE** Engine Armour
