

MONDOARMOR STRENGTH

PASSION AND PERFORMANCE.

MONDOARMOR STRENGTH IS A HIGH-PERFORMANCE VULCANIZED RUBBER FLOORING. IT PROVIDES THE PERFECT SUPPORT FOR THE MOST INTENSE STRENGTH AND CONDITIONING TRAINING INVOLVING HEAVY WEIGHTS.

CO-VULCANIZED MULTI-LAYER DUAL DUROMETER

Our track surfaces are made from two layers of solid rubber vulcanized together to form a continuous, seamless surface.

AIR-CELL TECHNOLOGY

Air-filled chambers on the bottom layer compress, then expand, acting like bowstrings and projecting athletes up and forward.

MONDOARMOR STRENGTH

Building strength and speed means constantly outdoing oneself. That takes determination and discipline, and a solid, comfortable, secure base.

WHEN WINNING IS NOT ENOUGH

To exceed one's limits, there's MondoArmor Strength. It's made up of three layers of vulcanized rubber: a wear layer to resist abrasions and lacerations; an intermediate layer to dissipate shock and stress from heavy loads; and a shock-absorbing underlayer with Air-Cell® technology to absorb impact and control vertical deformation and energy return. This triple-layered construction reduces the risk of injury by preventing weight bars from bouncing out of control. MondoArmor Strength is the ideal solution for weightlifting platforms and strength and conditioning areas.

SILENT AND IMPACT-RESISTANT

The extra-thick, multi-layered composition reduces impact sounds while providing superior shock absorption. MondoArmor Strength also boasts the best foot stability and comfort, and it has unsurpassed resistance to impact, tears, abrasions and cuts.
