press & media

bluecube produces a range of media solutions that are designed to meet the following venue requirements -

- Permanent - media areas - installed with fixed desks that accommodate a set number of seat positions.
- Temporary media areas - installed with a set number seats which can be quickly and easily 'changed out' to accommodate desks.
- Flexible - media areas- installed with a set number of seats and writing tablet arms which can be used as either general admission seating or as media positions.

layout requirements

- Min row depth **(RD)** requirement 1200mm
- Min average seat spacing **(SC)** 650mm

features

- 460mm desk top depth **(DD)**
- Continuous row installation (without intermittent egress steps)
- Optional modesty panel
- Automatic seat return

Permanent Desk – Low Density

DD – desk depth
460mm

DW – desk width
1300mm

SC – seat centres
Average 650mm

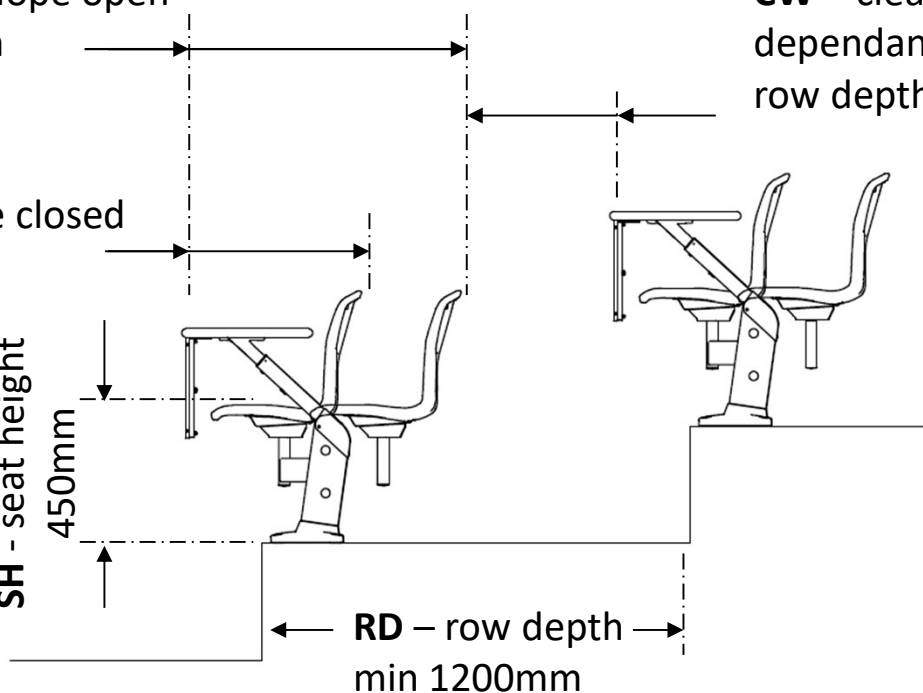

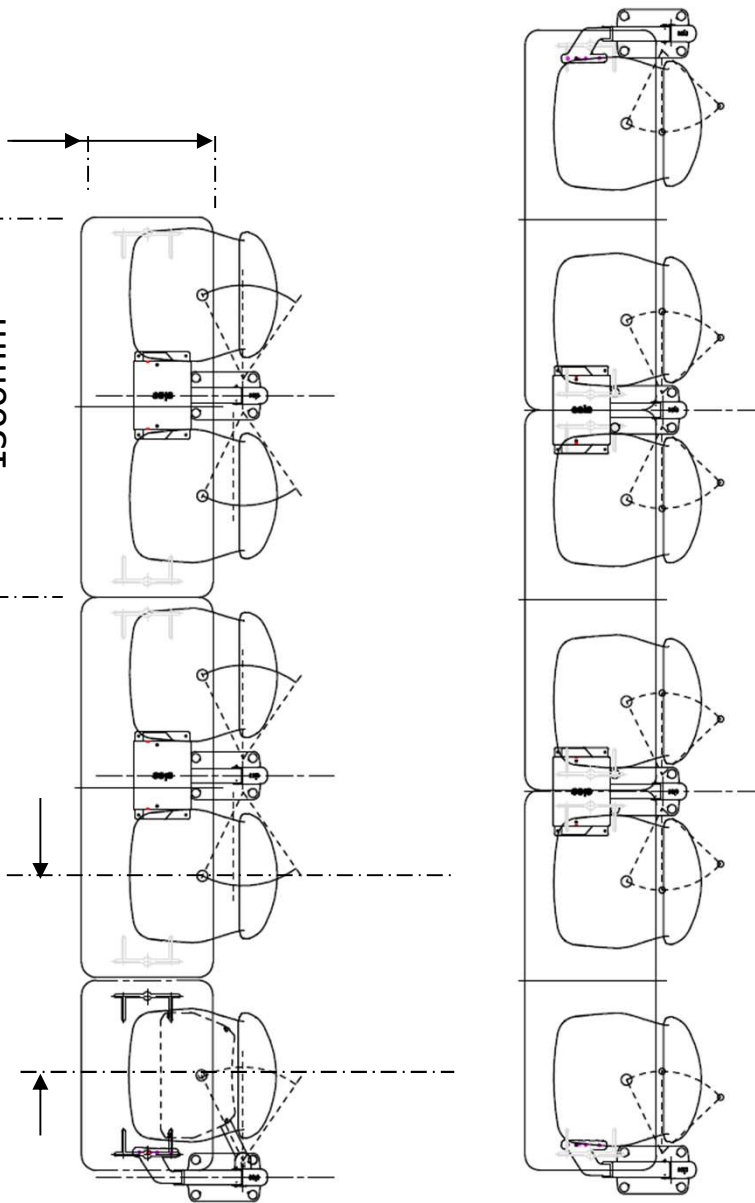

DEO – desk envelope open
980mm

DEC – desk envelope closed
630mm

SH – seat height
450mm

CW – clearway
dependant on
row depth

RD – row depth
min 1200mm

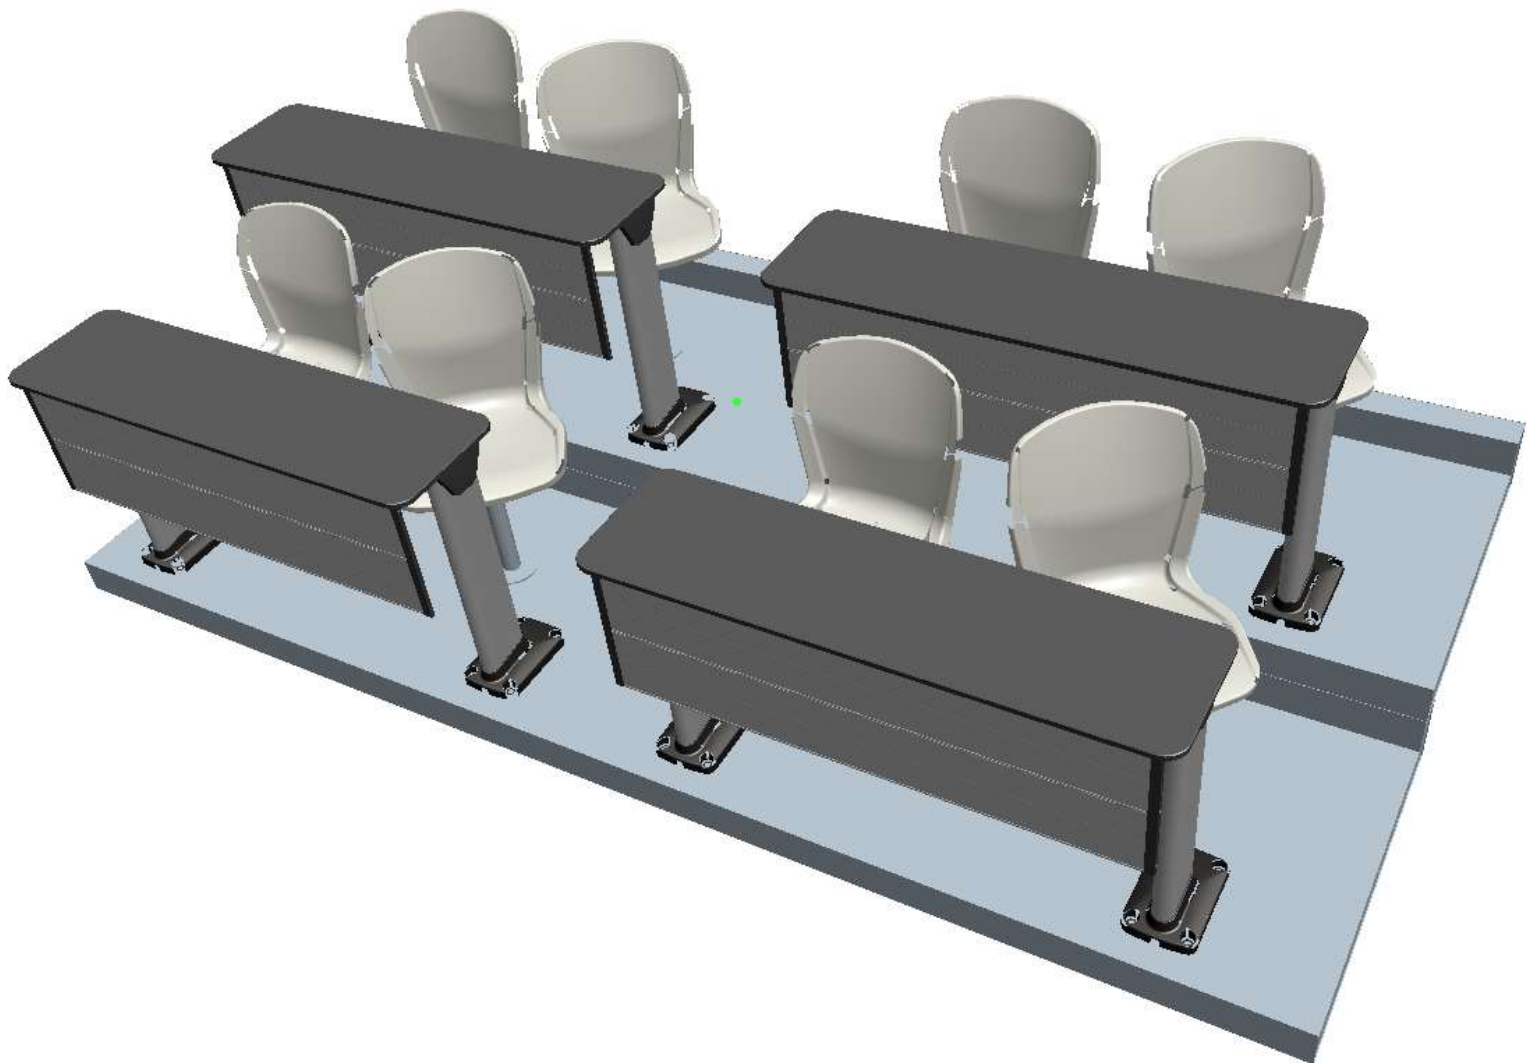

layout requirements

- Min row depth **(RD)** requirement 800mm
- Min seat spacing **(SC)** 550mm

Features

- 350mm desk top depth **(DD)**
- Requires egress steps (every 2 seat places)
- Optional modesty panel

Permanent Desk – Mid Density

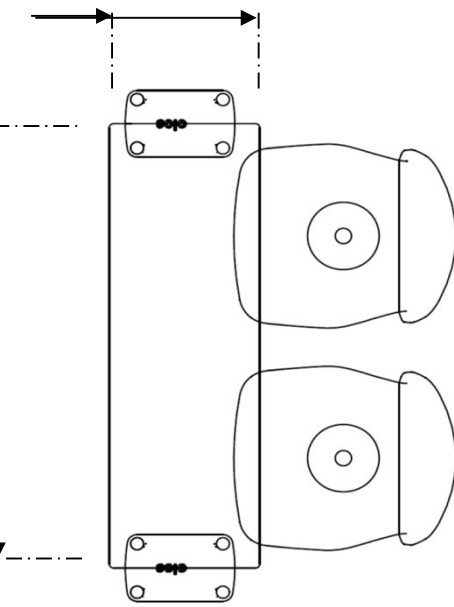

DD – desk depth

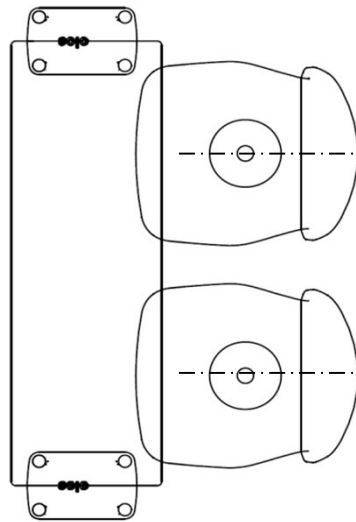

350mm

DW – desk width

1300mm

egress steps

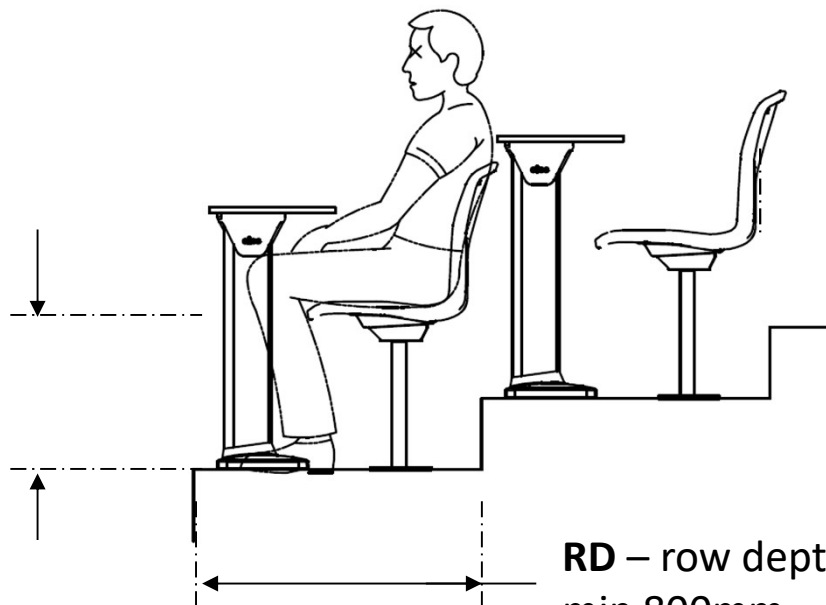

SC – seat centres
Min. 550mm

egress steps

SH - seat height

450mm

RD – row depth
min 800mm

layout requirements

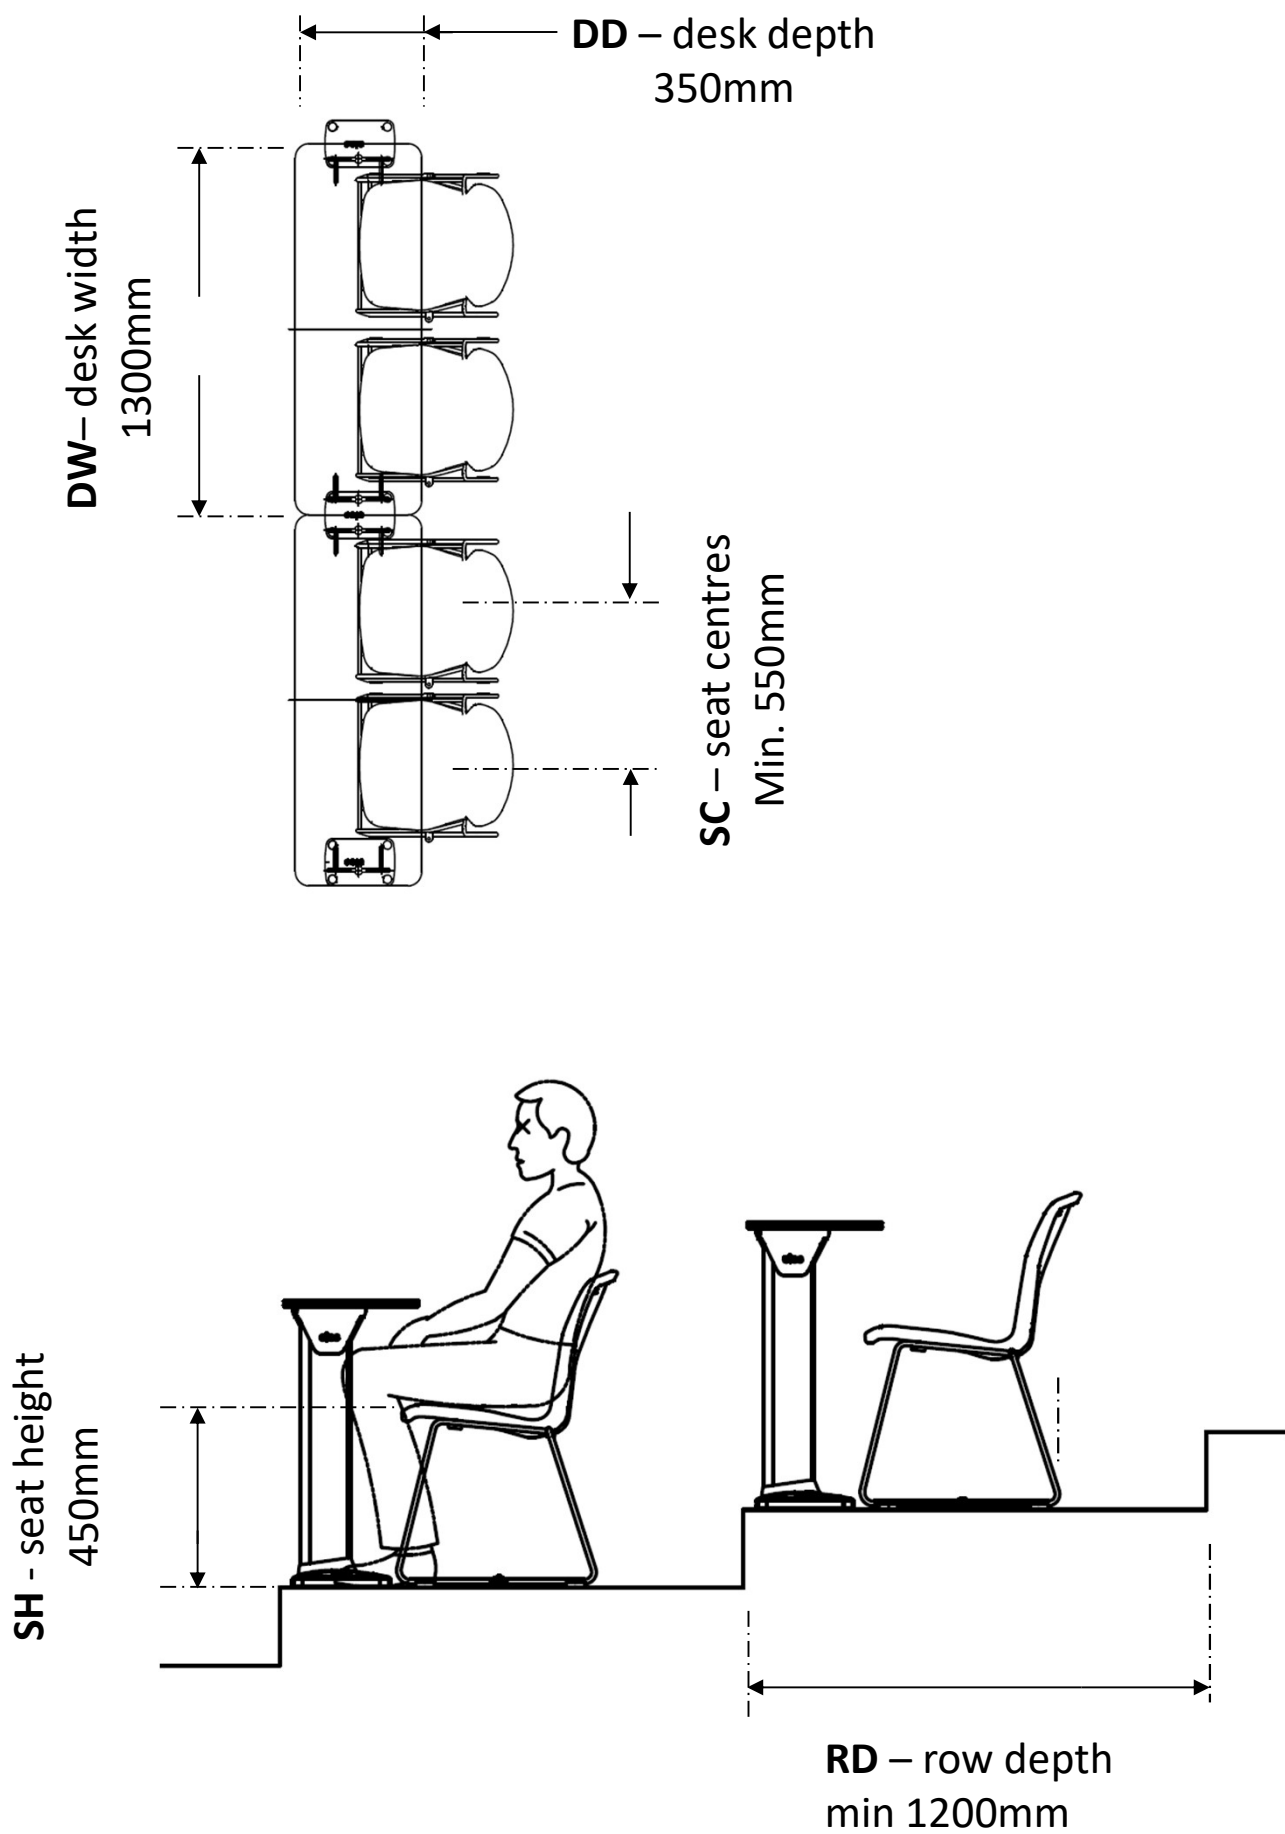

- Min row depth requirement **(RD)** 1200mm
- Min seat spacing **(SC)** 550mm

Features

- 350mm desk top depth **(DD)**
- Continuous row installation (without intermittent egress steps)
- Optional modesty panel

Permanent Desk – High Density

layout requirements

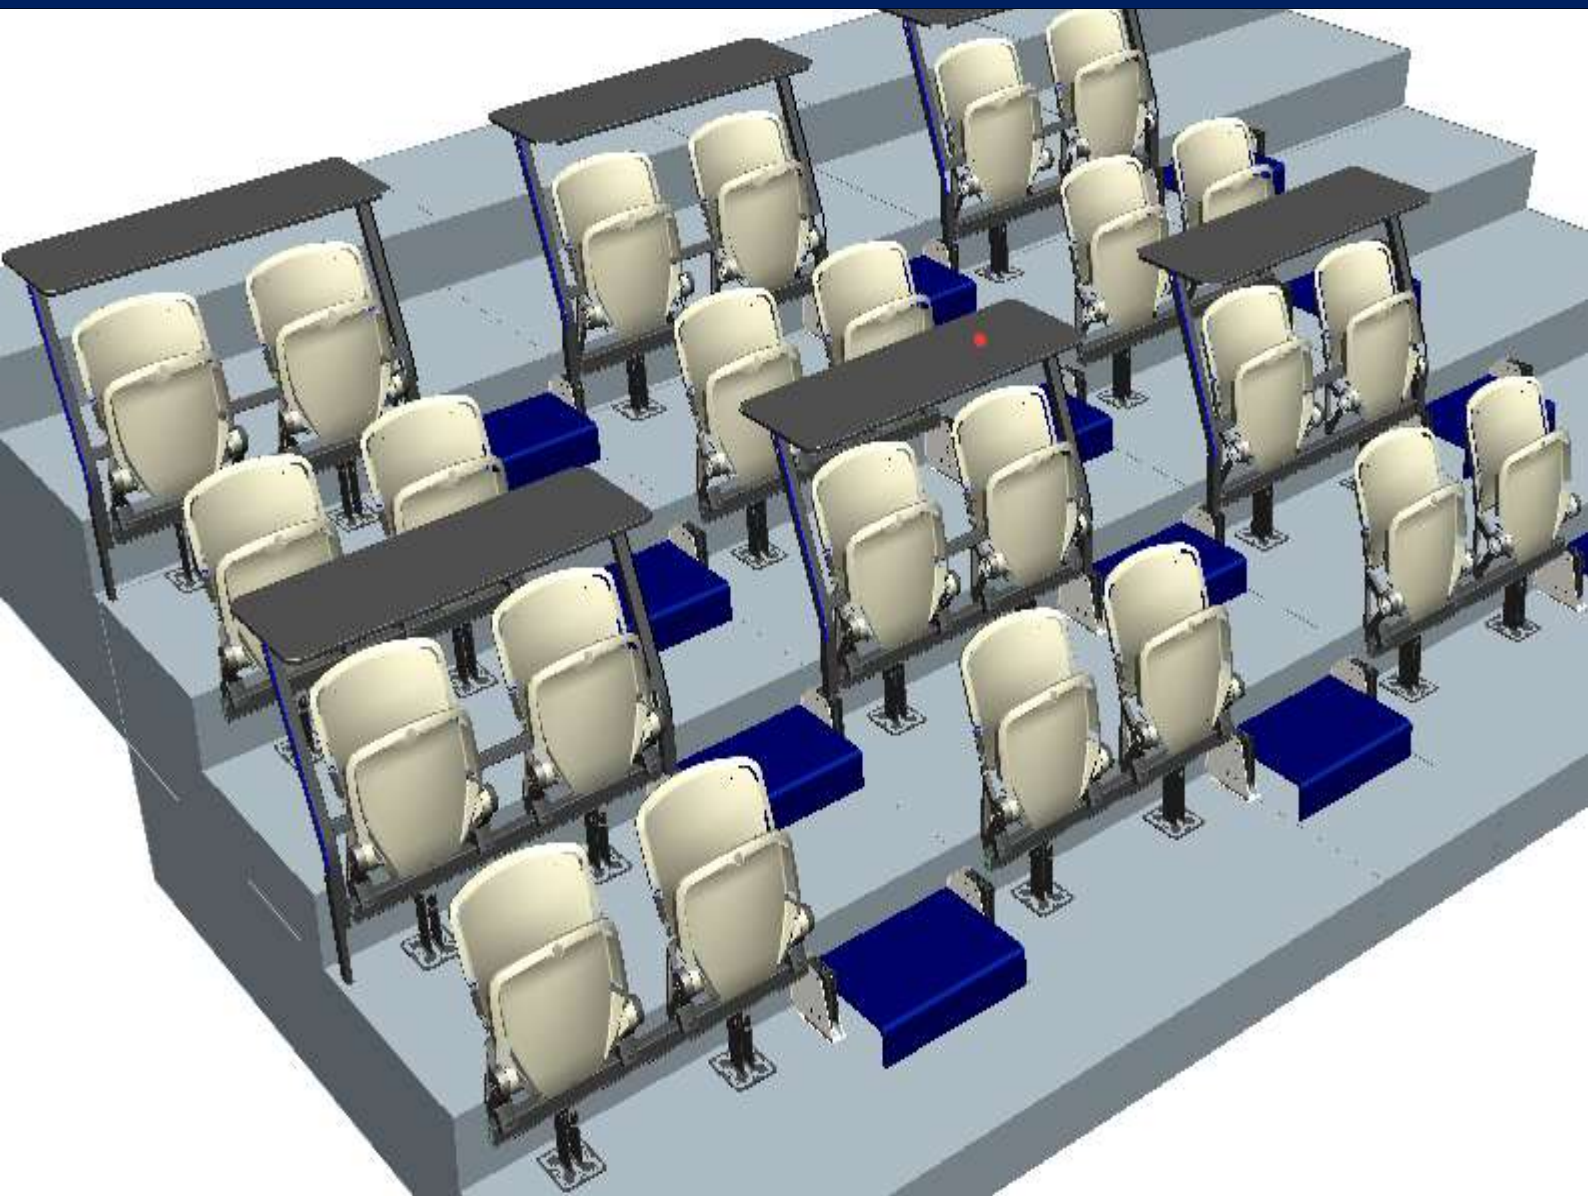

- Min row depth requirement **(RD)** 750mm
- Min seat spacing **(SC)** 500mm

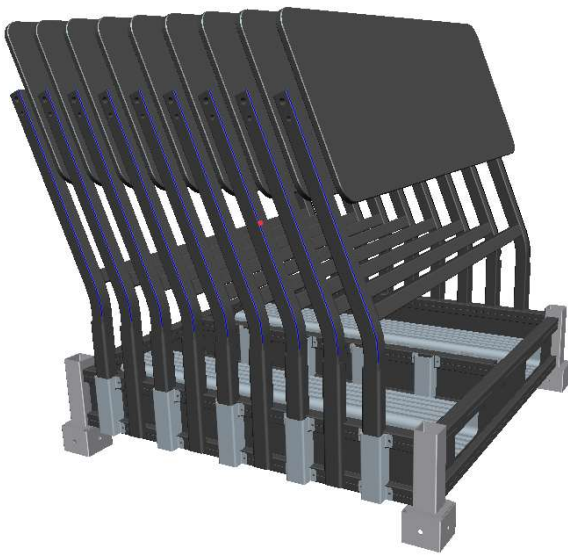

Features

- Choice of self tipping seat model
- Requires egress steps (every 2 seat places)
- Easy conversion to GA seating

Temporary Desk

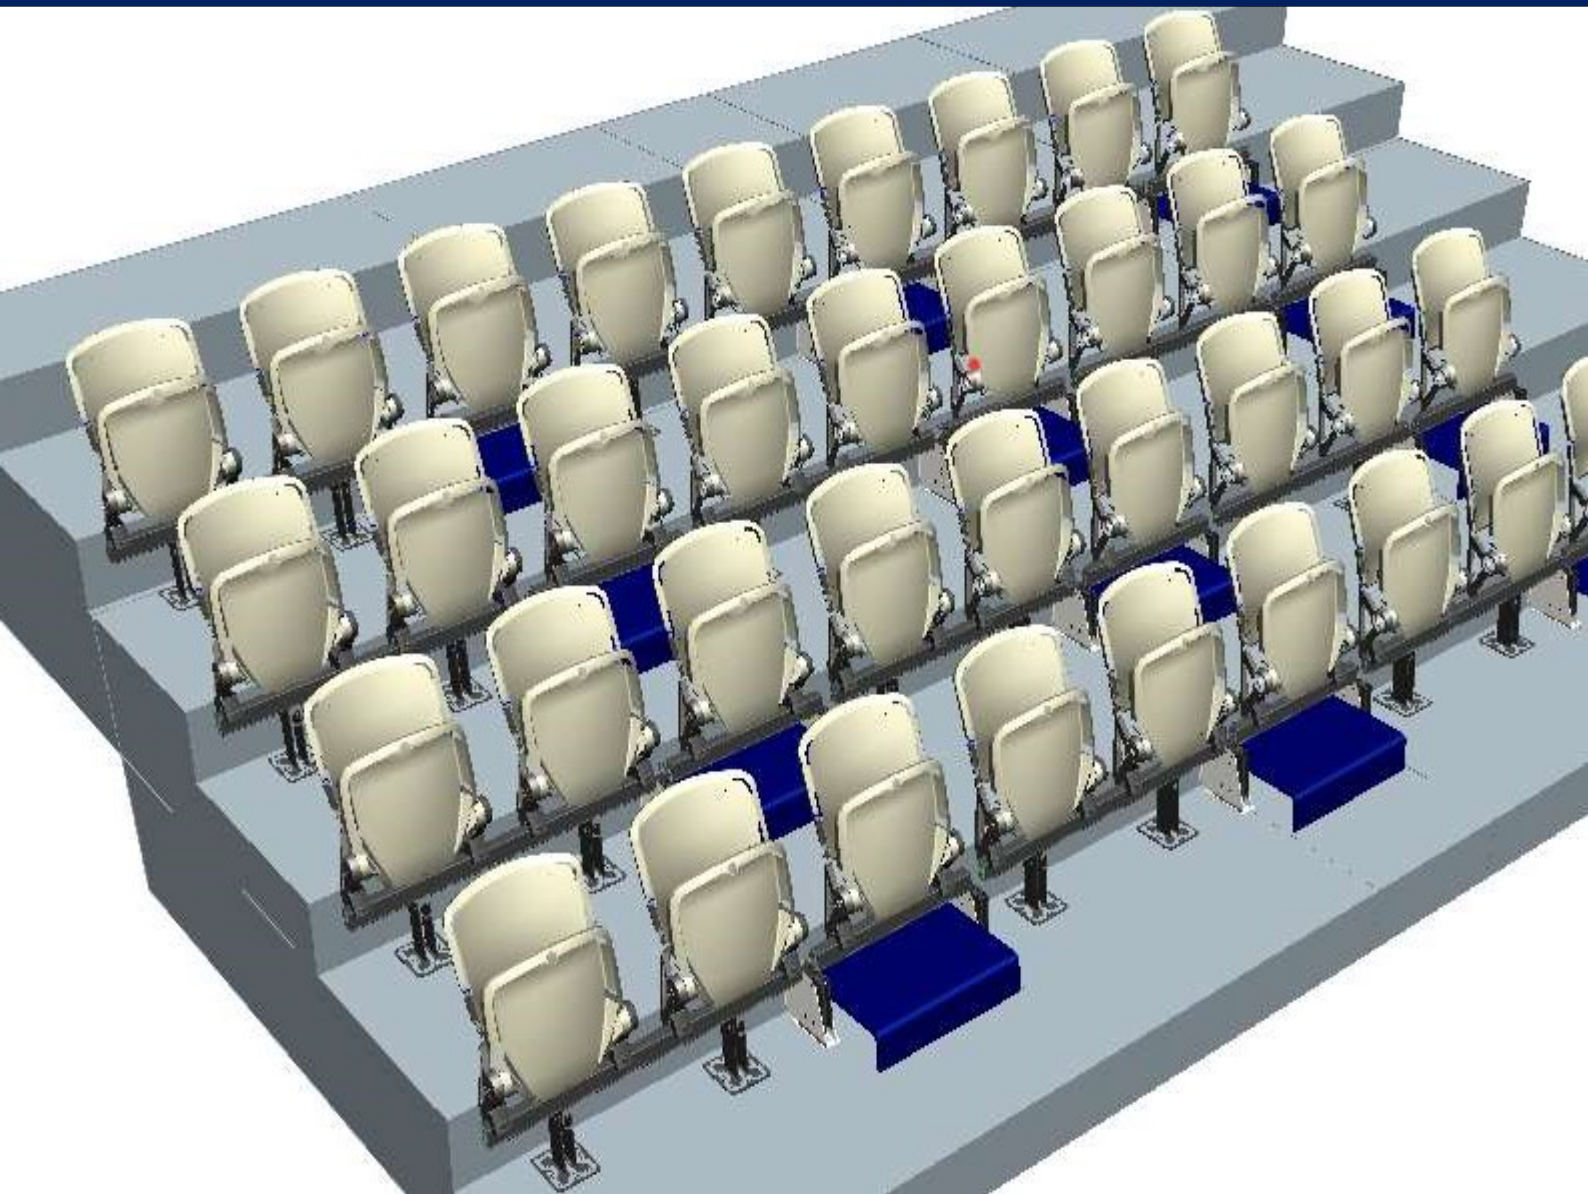

Typical layout shown in media mode

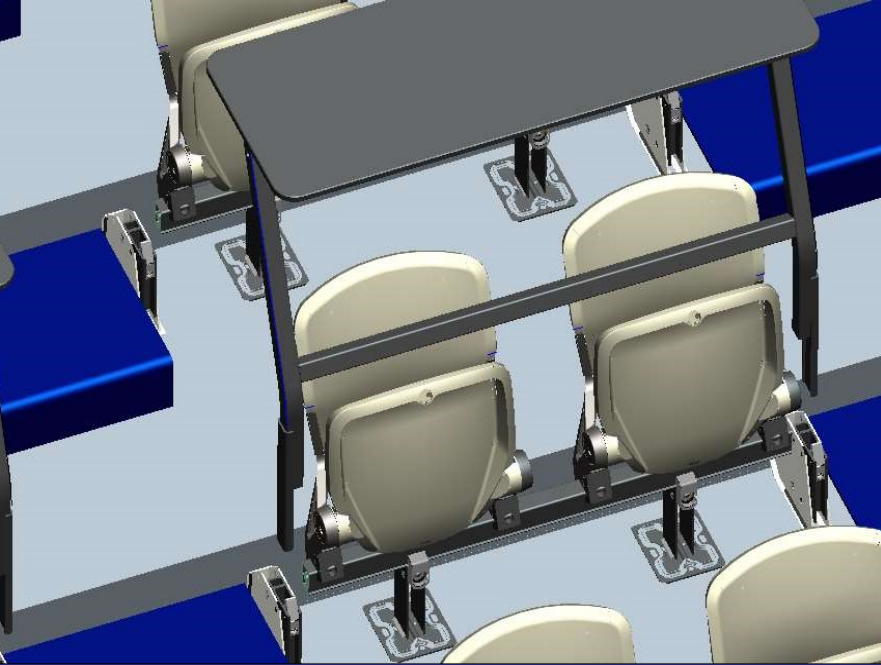

Light weight (25Kg) aluminium storage stillages are available for storage of the desk and seat units when they are removed from the layout.

Typical layout shown in seating mode

Step 1

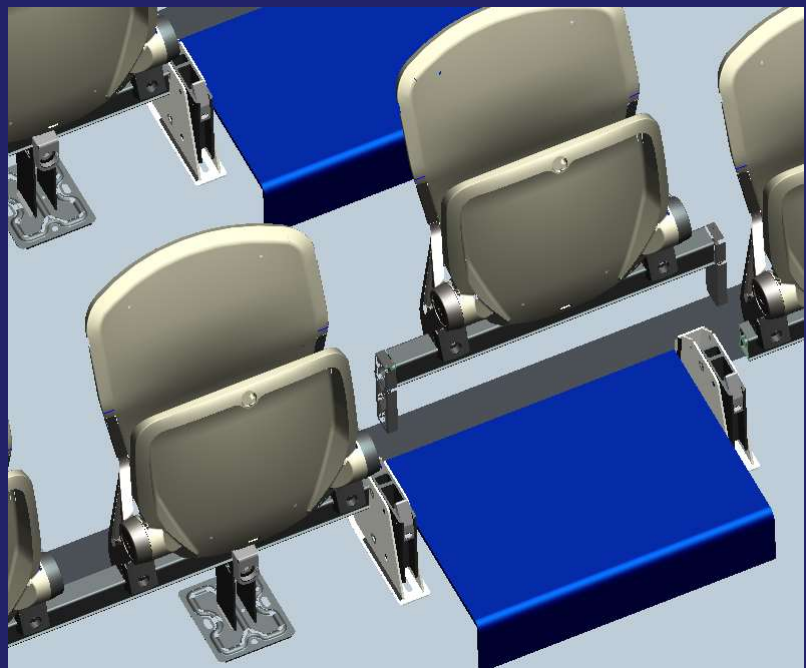

fast – latch mechanisms make changing over from a media to an all seated set up quick and easy – the area is arranged 2 & 1 seat modules.

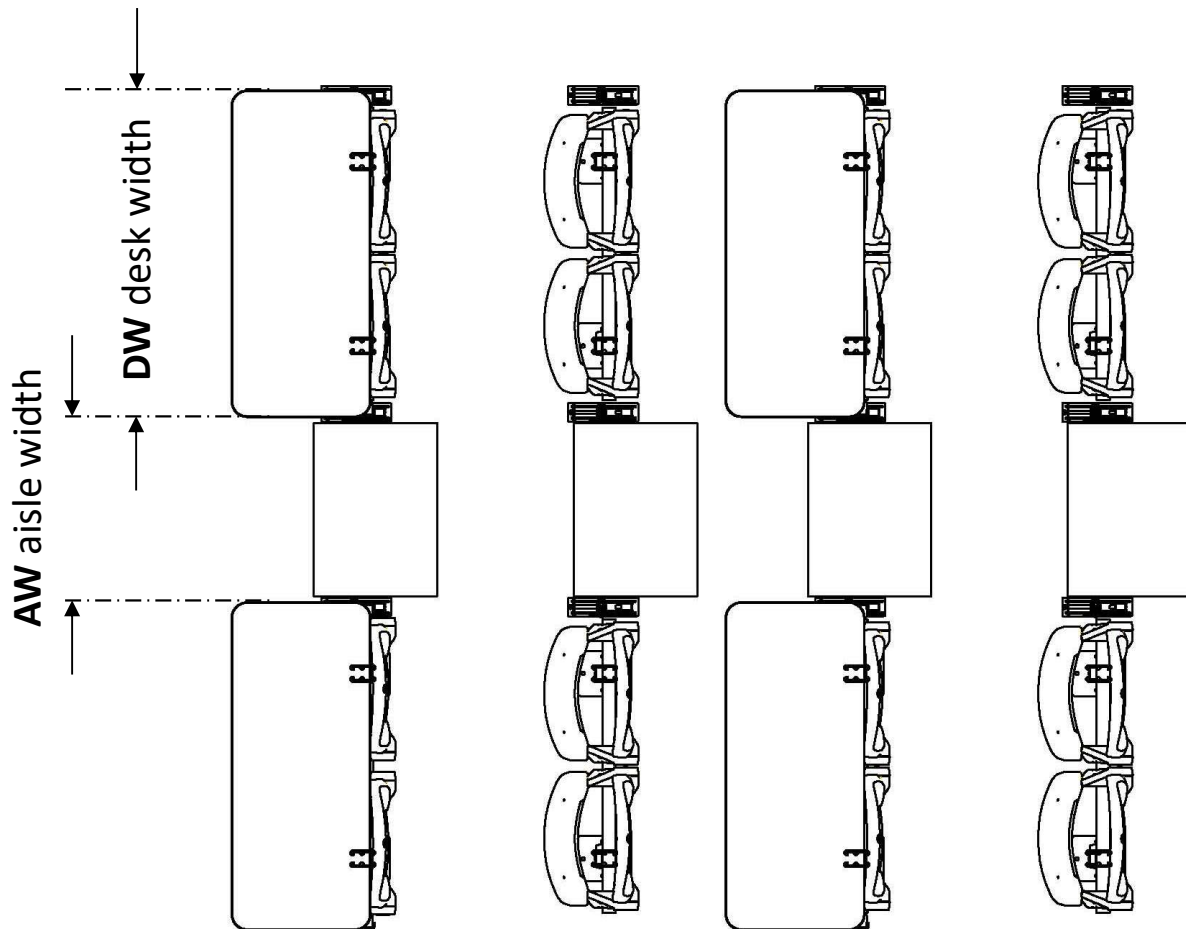

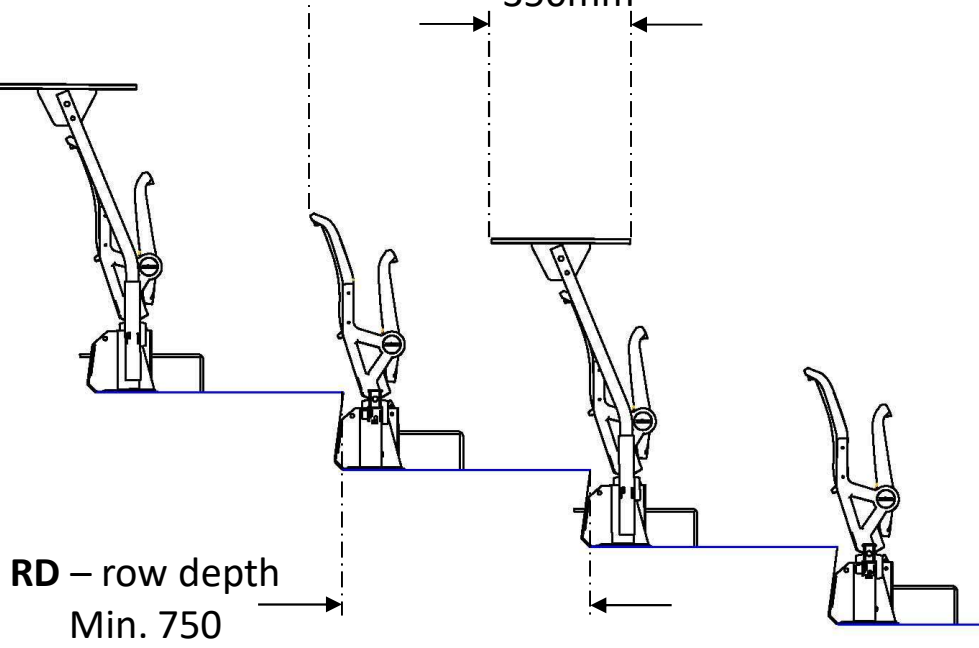

Changeover sequence from media to full seated general admission & vice versa.

- Step 1 - Remove desks from the **fast – latch** system.
- Step 2 - Plug in the single seat modules into the **fast – latch** system to infill the intermittent egress steps.

Step 2

DW desk width
350mm

layout requirements

- Min row depth requirement 800mm
- Min average seat spacing 550mm

Features

- Continuous row installation (without intermediate egress steps)
- Seats can be used as GA seats without re-configuration

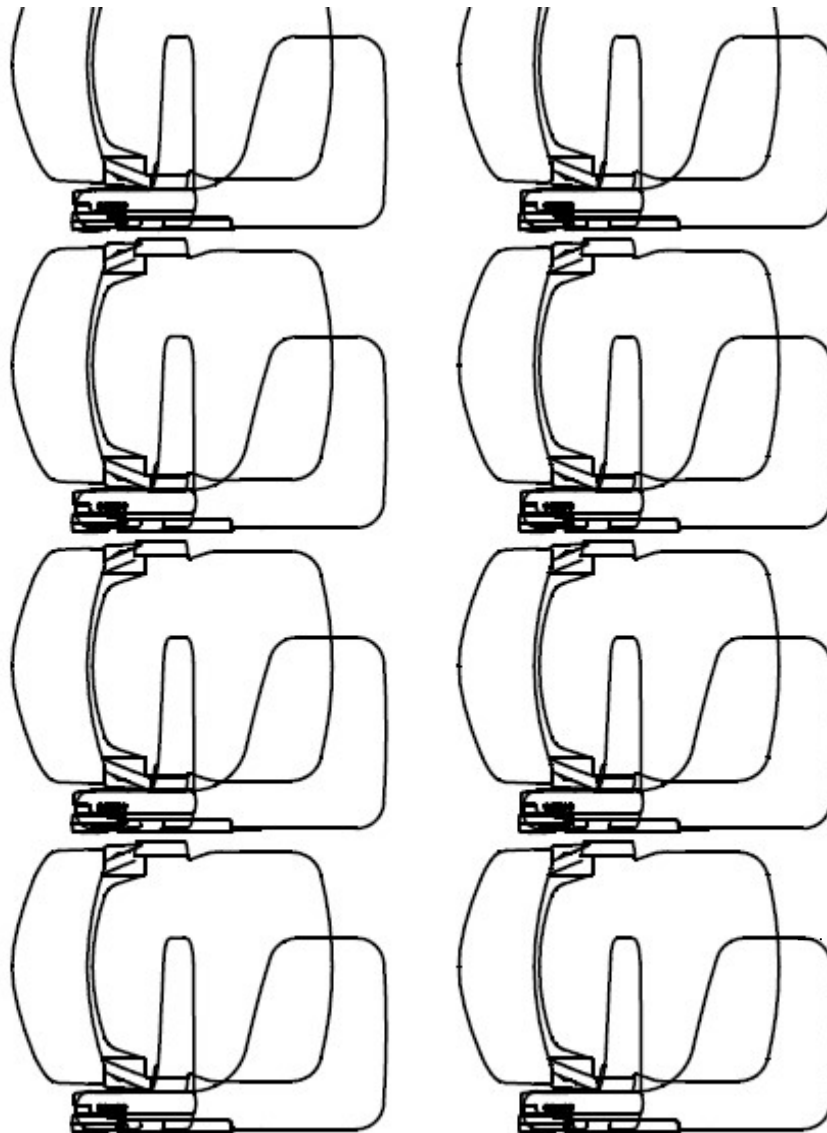

Flexible media areas

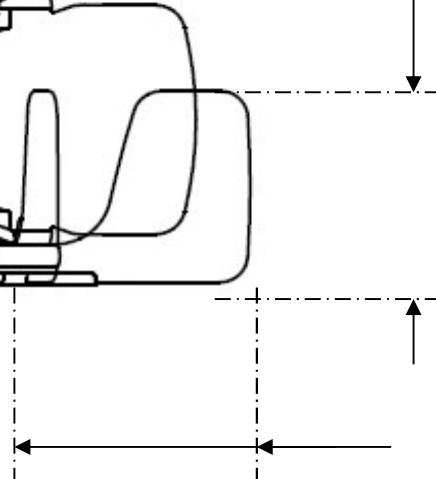

If the requirement is more flexibility than a permanent desk **scribe** folding tablet arms allow the media area to be sold as general admission then the tablet is in 'stowed' position – refer to the **scribe** product sheet for full detail.

Power and data can be provided at each position by the addition of an electrical conduit running the entire length of the row.

tablet width
350mm

tablet depth
560mm
